

SANS/CIS Partnership

Aggregate Buy Program | sans.org/partnership/cis

SANS's mission is to ensure that InfoSec practitioners in critical organizations have the skills needed to protect national security. The mission of the CIS CyberMarket is to serve state, local, territorial and tribal governments and not-for-profit entities in achieving a greater cybersecurity posture through trusted expert guidance and cost-effective procurement. As a result of this shared mission, CIS and SANS have developed a partnership agreement that provides highly discounted training to constituencies who have a clear impact on national security, a large number of information security practitioners, and budget constraints that limit their access to necessary training. The secret to this successful program is cost reduction realized by "aggregate" economies of scale.

To meet the particular needs of State, Local, Territorial and Tribal Governments (and related not-for-profits), SANS Institute has partnered with CIS to offer awareness and technical training at deeply discounted rates.

SANS products, training and services, including GIAC certification, cannot be resold without explicit and written approval from an official at SANS Institute.

Security Awareness training is a critical component of a comprehensive security program. Compliance and behavior change becomes difficult for non-technical individuals without the proper content. SANS Security Awareness offers a comprehensive solution for end users and individuals of all levels with expert-authored content.

Created by a trusted global network of cybersecurity professionals, this Partnership Program includes several key Security Awareness products:

- **EndUser** - Comprehensive security awareness training for all computer users based on the Critical Security Controls
- **Healthcare** - Computer-based security awareness training tailored to healthcare organizations
- **Developer** - Software security training for developers pertaining to the OWASP Top 10 Web vulnerabilities and the SDLC
- **Phishing Training** - Test employees through simulated phishing attacks and educate users how to avoid being compromised
- **Engineer** - Rigorous computer-based training for those interacting or operating with Industrial Control Systems

“I love your product. I implemented SANS Security Awareness at California Air Resources Board back in October 2012. I really enjoyed the program; I had 92% compliance with 1300 staff. Your product was an obvious choice for our organization here at Covered California.”

Terese Matchim, ISO for California Health Benefit Exchange

Online Training from SANS Institute is a flexible and effective option for information security professionals of all experience levels to complete SANS' top training from anywhere in the world. Two of SANS' available Online Training formats are OnDemand and vLive - each offering slightly different features so that students can choose the workflow, interaction and speed of training that they prefer.

■ **OnDemand**

SANS OnDemand courses provide the flexibility to train onlinewherever and whenever it's most convenient for you. Withfour months of access to the online course materials, includinglectures, quizzes, and labs, you can master the course content onyour schedule, at your own pace.

■ **vLive**

SANS vLive offers live SANS courses through an online, virtual training room. Courses are six weeks long, with contentpresented in the evenings twice a week—perfect for studentswho want extra study time between sessions. Students will have direct interactions with instructors along with Subject-Matter Expert support throughout training, and 6 months of online access to course content.

Which Online Training Method Is Best for You?

This comparison chart will help you decide.

GIAC Certifications develops and administers premier, professional information security certifications. More than 30 cyber security certifications align with SANS training and ensure mastery in critical, specialized InfoSec domains. GIAC Certifications provide the highest and most rigorous assurance of cyber security knowledge and skill available to industry, government, and military clients across the world.

A GIAC Certification ensures master of real-world knowledge and skills.

- Tests on pragmatics rather than theory
- Certifications are valid for four years
- A renewal process that keeps you up-to-date on the latest industry trends
- Advanced Certification Options: Publishing a Gold Paper through GIAC and/or Obtaining the GIAC Security Expert Certification

Top Four Reasons to Get GIAC Certified:

- 1. Promotes hands-on technical skills and improves knowledge retention.**
- 2. Provides credible proof of technical know-how.**
- 3. Creates opportunity for promotion and respect from peers.**
- 4. Demonstrates to hiring managers technical qualifications for career growth.**

What is NetWars Continuous?

SANS NetWars Continuous Online Range uses the gamification of IT Security to advance your most vital InfoSec skills. To build your skills and keep them from getting rusty, you need an environment where you can apply your knowledge to solving real-world infosec issues to stay sharp. That's what NetWars Continuous is all about. Over the course of 4 months and 5 levels, you can master real-world tactics and techniques in a safe learning environment.

NetWars Continuous - Always Available

- Allows participants an opportunity to advance their hands-on technical skills. Players learn the areas where they need to increase their proficiency so they may improve, come back, and continue the challenge.
- Gives participants four months of access to NetWars Continuous. At the end of the four months, participants will receive a written assessment of the skills which they demonstrated during NetWars.

Participants in SANS NetWars Continuous online challenge are given four months to experiment with real-world scenarios, and test their hands-on skills in several key areas:

- Vulnerability Assessments
- System Hardening
- Malware Analysis
- Digital Forensics
- Incident Response
- Packet Analysis
- Penetration Testing
- Intrusion Detection

Pricing:

\$1,760 per user for four-month period.
