The SANS Institute & Center for Internet Security Partnership Program

PARTNERSHIP OBJECTIVES

The Center for Internet Security and SANS Institute partnership draws on the shared mission to ensure that information security practitioners in critical organizations have the skills needed to protect national security and enhance cyber security readiness and response of State, Local, Tribal and Territorial government entities. This program offers both security awareness and online technical training courses to qualifying organizations at a substantial cost savings.

SANS ONLINE TRAINING

SANS premier Online Technical Training is a flexible and effective option for information security professionals of all experience levels to complete SANS' top training from anywhere in the world. Save 55% when you purchase training credits during one of our partnership purchase windows. Online training credits may be redeemed for any course offered in our two most popular online training formats: OnDemand and vLive. Security professionals have their choice from over 30 courses and certifications in disciplines that include:

- Cyber Defense
- Penetration Testing
- Forensics
- Management
- Industrial Control Systems

SANS SECURING THE HUMAN

SECURING THE HUMAN: While technical training is of paramount importance, SANS also recognizes that non-technical individuals need training on awareness and compliance if information security is to be achieved across an entire organization. Securing The Human goes beyond compliance and focuses on changing human behavior to offer a complete security awareness solution. Through the SANS partnership, qualified organizations can save on several key Securing The Human products:

- **STH.EndUser** - Comprehensive Security Awareness training for all computer users based on the 20 Critical Security Controls.
- **STH.CIP** - Addresses NERC CIP Reliability Standards required by the Utility industry.
- **STH.Developer** - Software security training for Developers pertaining to OWASP Top 10 Web Vulnerabilities and SDLC.
- **STH.Healthcare** - Computer based Security Awareness training tailored for healthcare organizations.
