SANS Boston 2009

<http://www.sans.org/boston09>

My August recommendation for a great regional event is SANS Boston 2009. In Boston, we are offering our most popular five-and six-day courses and four one-day courses that complement the full courses. You get the chance to register for a curriculum that suits your needs and broadens your training. In this economy, you can use a break. **Choose a short course to go with your full course and save up to 50% on your extra training.** Maximize your investment with the best training your money can buy!

SANS Boston 2009 features these top-rated courses:

- **SEC401: SANS Security Essentials Bootcamp Style**
- **SEC504: Hacker Techniques, Exploits & Incident Handling**
- **SEC560: Network Penetration Testing and Ethical Hacking**
- **SEC508: Computer Forensics, Investigation, and Response**
- **MGT512: SANS Security Leadership Essentials for Managers with Knowledge Compression™**
- **MGT414: SANS® +S™ Training Program for the CISSP® Certification Exam**

The one-day courses we are offering (with the suggested full course):

- **SEC553: Metasploit for Penetration Testers (with SEC560)**
- **SEC517: Cutting-Edge Hacking Techniques (with SEC504)**
- **SEC526: Advanced Filesystem Recovery and Memory Forensics (with SEC508)**
- **MGT 432: Information Security for Business Executives (with SEC512)**

Our downtown Boston location, the Hyatt Regency Boston, is just one block from the Boston Commons, the Freedom Trail, and great shopping. You are steps away from Fenway Park and China Town. **SANS has arranged for discounted room rates of \$199 S/D which include high-speed Internet access in your room. Make your reservations now as this special rate is only available through July 7, 2009.**

I hope you will join me in Boston where I will be teaching MGT512 and MGT432, which would be an excellent course for your CEO or vice president looking to learn the fundamentals of information security.
