SANS Feature
Stephen's Pick for December
SANS Cyber Defense Initiative 2015
sans.org/cdi-2015

Please join us for SANS Cyber Defense Initiative 2015 (CDI) in Washington, DC, December 12-15. SANS is the one educational organization known for developing the cybersecurity skills needed most right now. SANS Cyber Defense Initiative 2015 will feature courses in IT security, security management, IT audit, penetration testing, and computer forensics, including short courses that can be taken with a long course to enhance your training.

SANS events offer you a unique opportunity to learn from the best cybersecurity teachers in the country. At SANS events you get the kind of hands-on, immersion training that you can put to work immediately. Every course, evening talk, and special event is designed to equip you with cutting-edge knowledge and skills required to combat today's cyber criminals. This event offers two types of NetWars, and is abundant in unique bonus sessions, such as "Securing The Kids" presented by Lance Spitzner, and "The Crazy New World of Cyber Investigations: Law, Ethics and Evidence" by Benjamin Wright.

I realize many of you prefer a smaller class size so you can get individual attention, which is hard to do at a major event like CDI 2015. However, I know you won't be disappointed by the vast array of features offered at this event. We also monitor registrations and try to give you tips where you can find a SANS course with a top notch instructor and a smaller class size. So make your plans to attend, and experience the excitement of SANS training at this outstanding annual training event!
