Stephen's Pick for December

SANS Cyber Defense Initiative 2016

www.sans.org/event/cyber-defense-initiative-2016

Please join us for SANS Cyber Defense Initiative (CDI) 2016 on December 10-17 in Washington DC, and get the training you need to make your organization cybersecure. SANS CDI 2016 features courses in IT security, security management, IT audit, penetration testing, and computer forensics, including short courses that can be taken with a long course to enhance your training. Every course, evening talk, and special event is designed to equip you with cutting-edge knowledge and skills required to combat today's cyber criminals. With attackers growing more brazen and exploiting mission-critical computer systems, it is more important now than ever to ensure you are ready with the latest skills and techniques to excel.

SANS CDI 2016 also offers an impressive line up of Bonus Sessions, including lessons learned from the Ukrainian power grid attack, securing your kids' digital world, and perception management in information warfare. Test your skills at the DFIR NetWars Tournament, CORE NetWars Experience, and the Annual NetWars Tournament of Champions. With award-winning faculty, constantly updated courses, and must-see evening talks, SANS CDI is the best place to learn today's most effective cyber defense tools and techniques.

I realize many of you prefer a smaller class size so you can get individual attention, which is hard to do at a major event like SANS CDI 2016. However, I know you won't be disappointed by the vast array of features offered at this event. We also monitor registrations and try to give you tips where you can find a SANS course with a top-notch instructor and a smaller class size. So make your plans to attend, and experience the excitement of SANS training at this outstanding training event!
