SANS Feature

Stephen's Pick for December

SANS CDI 2009

<http://www.sans.org/cyber-defense-initiative-2009>

I know that many of you prefer a smaller class size so that you can get individual attention. That is hard to do at the major events like SANS CDI 2009, but we monitor registration and try to give you tips where you can find a SANS class with a topnotch instructor and a smaller class size.

I'm excited to invite you to two events being held this December in one location in Washington DC. Don't miss **SANS Cyber Defense Initiative 2009** (CDI) December 11-18 and the inaugural **WhatWorks in Incident Detection Summit** December 9-10, 2009. CDI 2009 brings SANS' best new courses to Washington DC to serve the nation's most sophisticated cyber security community. See our new courses in hacker, wireless, secure coding, pen testing, virtualization, 20 critical controls, and more. SANS is the one education organization known for developing those security skills now most in need. Don't miss this unique chance to learn from the best teachers in security. Come early for the inaugural WhatWorks in Incident Detection Summit in the same location. If you liked the Forensics Summit, this is the ideal partner event to enhance your knowledge.

Along with seven new courses, CDI is hosting sixteen classic SANS courses that you have come to expect. For the whole list of courses and complete course descriptions see our Courses-a-a-Glance page: <http://www.sans.org/cyber-defense-initiative-2009/event.php>

SANS will be back at the **Marriott Wardman Park Hotel** for both the Summit and CDI 2009. A special rate of \$197 S/D has been arranged for SANS attendees, which includes complimentary high-speed Internet in your guest room! Adjacent to Rock Creek Park on 16 lush acres of gardens, you'll enjoy a magnificent setting that puts all the best of DC right at your fingertips - the Smithsonian Museums, the National Zoo, Georgetown, the Kennedy Center, a fabulous selection of stores and restaurants, and more! Make your reservations now as this special rate is based on space availability.

To follow or to Tweet about these events, please use hashtag **#sanscdi** and **#sansincidentdetect**. To follow SANS, use <http://twitter.com/SANSInstitute>.

Register by October 28 to receive the best savings! Start making your training and travel plans now to join us for SANS Cyber Defense Initiative 2009 <http://www.sans.org/cyber-defense-initiative-2009/location.php> and the WhatWorks in Incident Detection Summit <http://www.sans.org/incident-detection-summit-2009>.
