

THE MOST TRUSTED NAME FOR  
INFORMATION AND SOFTWARE SECURITY

In 2010, SANS offers an industry leading mix of regional and national IT security conferences and summits. Training over 10,000 technically savvy security professionals annually, SANS events bring together the most qualified community of INFOSEC buyers, influencers and decision makers to meet with proven and emerging solution providers. Solution providers benefit from high lead volume across private and public organizations and accelerated sales cycles due to prospect experience and need for proven solutions that meet the challenges outlined in their training agenda.

Sponsorship opportunities range from exhibiting at conference expos to hosting intimate educational session where product features and functionality can be demonstrated and displayed. Due to the level of technical and executive experience of the SANS community, opportunities for interaction with SANS event attendees fill quickly. Sponsors are encouraged to plan early for the following 2010 events. Multi-event discounts and bundled promotions are currently available. Please contact your SANS account manager today to discuss availability, options, and how to qualify as a "SANS Premier Sponsor" for 2010.
