LDR414: SANS Training Program for CISSP® Certification

Need training for the CISSP® exam?
SANS LDR414: SANS Training Program for CISSP® Certification is an accelerated review course that is specifically designed to prepare students to successfully pass the Certified Information Systems Security Professional (CISSP®) exam.

LDR414 focuses solely on the eight domains of knowledge as determined by (ISC)² that form a critical part of the CISSP® exam. Each domain of knowledge is dissected into its critical components, and those components are then discussed in terms of their relationship with one another and with other areas of information security.

After completing the course, students will have:

• Detailed coverage of the eight domains of knowledge
• The analytical skills required to pass the CISSP® exam
• The technical skills required to understand each question
• The foundational information needed to become a Certified Information Systems Security Professional (CISSP®)

External Product Notice:
The CISSP® exam itself is not hosted by SANS. You will need to make separate arrangements to take the CISSP® exam. Please note as well that the GISP exam offered by GIAC is NOT the same as the CISSP® exam offered by (ISC)².

Course Authors' Statement
“The CISSP® certification has been around for nearly 25 years. The exam is designed to test your understanding of the Common Body of Knowledge, which may be thought of as the universal language of information security professionals. It is often said to be a mile wide and two inches deep. The CISSP® exam covers a lot of theoretical information that is critical for a security professional to understand. However, this material can be dry, and since most students do not see the direct applicability to their jobs, they find it boring. The goal of this course is to bring the eight domains of knowledge of the CISSP® to life. The practical workings of this information can be discovered by explaining important topics with stories, examples, and case studies. We challenge you to attend the SANS CISSP® training course and find the exciting aspect of the eight domains of knowledge!”
—Eric Conrad and Seth Misenar

You Will Be Able To
• Understand the eight domains of knowledge that are covered on the CISSP® exam
• Analyze questions on the exam and be able to select the correct answer
• Apply the knowledge and testing skills learned in class to pass the CISSP® exam
• Understand and explain all of the concepts covered in the eight domains of knowledge
• Apply the skills learned across the eight domains to solve security problems when you return to work

What You Will Receive
• Electronic courseware for each of the eight domains
• 320 questions to test knowledge and preparation for each domain
• MP3 audio files of the complete course lectures

“This course really pulls a lot together for me and it has been hugely valuable. I know parts of this are going to impact my approach to my work from the first day back.”
—Merewyn Boak, Apple
