The Concept

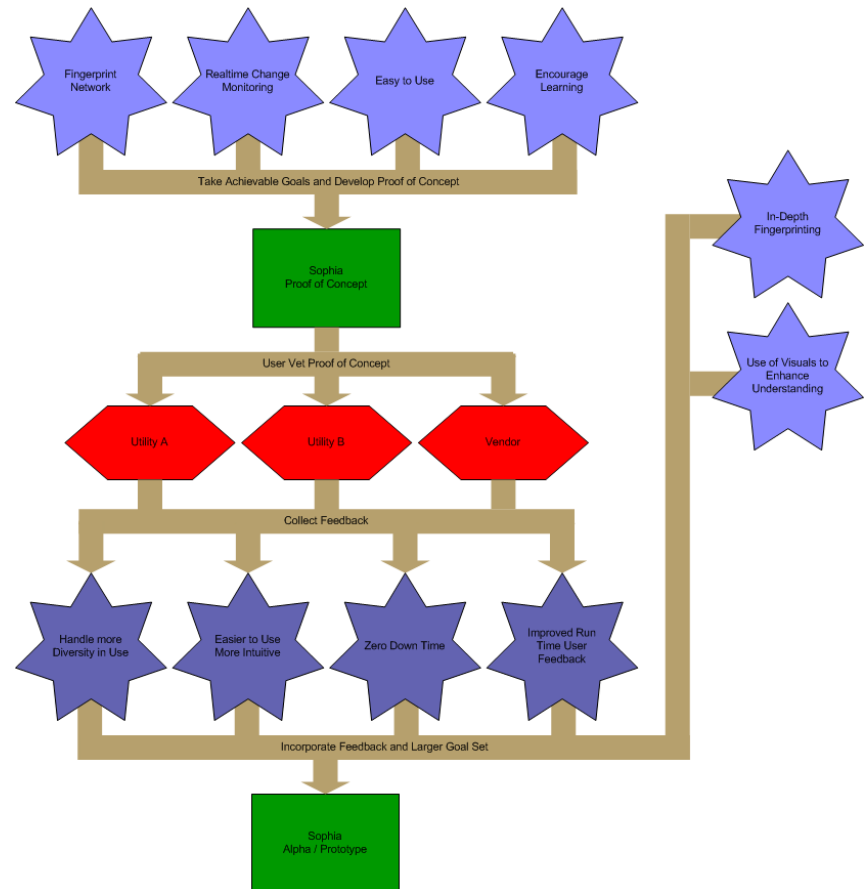

Process

- Develop proof of concept
- Bracket target users
 - Utility with simple architecture
 - Utility with complex architecture
- Receive feedback and plan for the next step

- Redesign and begin development of prototype software
- Expand user testing

Feedback

- More diverse environments
- 15 minutes daily
- System at a glance display
- Zero down time
- Improved user feedback
- Saved a man-month of time
- Saves the cost and time of a person watching the network continuously

Next Step

- Write and submit proposals for continued funding
- Begin work on the Sophia prototype / alpha version
- Test Sophia alpha at a larger set of utilities.
