How Control System Vendors are responding to emerging vulnerabilities and threats

- Making cyber security an organizational priority with top level management support
- Treating Cyber Security not only as a technical issue
- Realizing that effective solutions require strong partnerships, nobody can do it alone
How Control System Vendors are responding to emerging vulnerabilities and threats

- Making cyber security an organizational priority with top level management support
- Treating Cyber Security not only as a technical
- Realizing that effective solutions require strong partnerships, nobody can do it alone
How Control System Vendors are responding to emerging vulnerabilities and threats

• Technology integration
  – Implement and integrate multiple layers of security technology
  – …. while assuring no adverse impact to critical control systems

• Operations efficiency
  – Integrate security administration into daily operational processes
  – …. with little or no increase in operations expense and personnel

• Compliance audit support
  – Respond rapidly to intense auditor demands regarding current and historical systems security information
  – …. or face regulatory fines and corporate compliance exceptions

• Strong partnerships with control system vendors
ABB -Industrial Defender Partnership
Benefits for end-users

- Combined know-how
- Tested and verified solutions
- Alignment of technologies
- Unified support

→ More efficient and effective solutions through tight integration
ABB - Industrial Defender Partnership

Benefits for end-users

Robust, security enabled ABB – products

Defense in Depth

Industrial Defender cyber security solutions
Power and productivity for a better world™
