

How to improve recruitment, retention and workforce performance in cybersecurity. In just 60 minutes.

SANS CyberTalent Assessments offer a suite of six online tools that quickly and effectively give managers the insights they need to:

- Improve their ability to identify the best job candidates
- Develop more effective professional development plans
- Increase the productivity of training investment

CyberTalent Assessments include the following six tools:

- Aptitude
- CyberTalent Enhanced (CTE)
- Cyber Defense
- Penetration Testing
- Digital Forensics
- Application Security

Simple and convenient to use

- Most Assessments are 60 minutes in duration.
- Online (12 month access)
- Results Reports - rank and analyze candidates by skills and across domains as well as identify skills gaps.

"The assessment tool has been great and we have used it for almost all of our hires on the Security program we support. Also, we have used it to baseline a few current employees. So far it has been wonderful."

– Mike Schmidt, Triumph Enterprises, Inc., Talent Acquisition Lead
