

SANS/REN-ISAC Partnership

Aggregate Buy Program | sans.org/partnership/education

SANS' mission is to ensure that info security practitioners (InfoSec) in critical organization have the appropriate skills to protect national security. Similarly, the REN-ISAC mission is to aid and promote cybersecurity protection and response within the higher education and research (R&E) communities. As a result of these shared missions, SANS and REN-ISAC have developed a Partnership Program offering highly discounted training to constituencies who have a clear impact on national security.

We recognize educational institutions have budget constraints for needed security training. This exclusive program provides two purchase windows, annually, where institutions may purchase training at highly discounted rates for use throughout the year. Eligible institutions include accredited:

- Colleges
- Universities
- Technical Training Institutes
- K-12 Schools

*For qualifying institutions in the U.S. and Canada only.

Security Awareness Training

Security Awareness training is a critical component of a comprehensive security program. Compliance and behavior change becomes difficult for non-technical individuals without the proper content. SANS Security Awareness offers a comprehensive solution for end users and individuals of all levels with expert-authored content. Created by a trusted global network of cyber security professionals, this Partnership Program includes several key Security Awareness products:

- End User Comprehensive security awareness training for all computer users based on the Critical Security Controls
- Healthcare Computer-based security awareness training tailored to healthcare organizations
- **Developer** Train your developers in secure coding techniques and how to recognize current threat vectors in web applications
- Engineer Rigorous computer-based training for those interacting or operating with Industrial Control Systems
- Phishing Test your employees through phishing simulations consistent with real world attacks

^{*}Service level and hosting options are available at an additional cost.

^{*}Additional program discounts apply when Phishing is bundled with End User awareness training.

Online Training

Online Training from SANS Institute is a flexible and effective option for information security professionals of all experience levels to complete SANS' top training from anywhere in the world. Two of SANS's available Online Training formats are OnDemand and vLive – each offering slightly different features so that students can choose the workflow, interaction, and speed of training they prefer.

OnDemand

SANS OnDemand courses provide the flexibility to train online wherever and whenever it's most convenient for you. With four months of access to the online course materials, including lectures, quizzes, and labs, you can master the course content on your schedule, at your own pace.

Live Online

SANS Live Online features livestreamed, interactive training with SANS' top instructors you can take from anywhere. Choose from 1, 2, 3, or 6 week schedules from our full catalog of courses. Hands-on lab exercises and the ability to engage with your instructors and peers elevate the learning experience.

GIAC CERTIFICATIONS

Cybersecurity Certifications

GIAC Certifications develops and administers premier, professional information security certifications. More than 30 cybersecurity certifications align with SANS training and ensure mastery in critical, specialized InfoSec domains. GIAC Certifications provide the highest and most rigorous assurance of cyber security knowledge and skill available to industry, government, and military clients across the world.

A GIAC Certification ensures master of real-world knowledge and skills.

- Tests on pragmatics rather than theory
- Certifications are valid for four years
- A renewal process that keeps you up-to-date on the latest industry trends
- Advanced Certification Options: Publishing a Gold Paper through GIAC and/or Obtaining the
- GIAC Security Expert Certification

Top Four Reasons to Get GIAC Certified:

- 1. Promotes hands-on technical skills and improves knowledge retention.
- 2. Provides credible proof of technical know-how.
- 3. Creates opportunity for promotion and respect from peers.
- 4. Demonstrates to hiring managers technical qualifications for career growth

NetWars Continuous

What is NetWars Continuous?

SANS NetWars Continuous Online Range uses the gamification of IT security to advance your most vital InfoSec skills. To build your skills and keep them from getting rusty, you need an environment where you can apply your knowledge to solving real-world InfoSec issues to stay sharp. That's what NetWars Continuous is all about. Over the course of four months, you can master real-world tactics and techniques in a safe learning environment.

NetWars Continuous – Always Available

- It allows participants an opportunity to advance their hands-on technical skills. Players learn the areas where they need to increase their proficiency so they may improve, come back, and continue the challenge.
- It gives participants four months of access to NetWars Continuous. At the end of the four months, participants will receive a written assessment of the skills which they demonstrated during NetWars.
- Participants may choose from one of two NetWars Continuous Versions:
 Core NetWars Continuous or DFIR NetWars Continuous to experiment with real-world scenarios and develop hands-on skills.

Core NetWars Continuous Topics

- PowerShell challenges
- Network traffic capture and analysis
- Penetration testing
- Common Management System vulnerability exploitation
- Threat detection through log analysis
- Windows and Linux privilege escalation
- Cryptographic security and exploitation
- Advanced malware analysis
- Intrusion detection
- Linux fundamentals

- Windows exploitation
- Command Line Kung Fu
- Advanced database hacking
- Reverse engineering and debugging
- Binary exploitation
- Firewall fundamentals
- Fuzzing
- Social engineering
- WAF evasion
- Scanning/Enumeration

DFIR NetWars Continuous Topics

- Digital Forensics
- Incident Response
- Threat Hunting
- Malware Analysis
- Endpoint Forensics
- Network Forensics
- Memory Analysis

Pricing

\$2,125 per user for a four-month period.
