

Oil & Gas Briefing

Chairman: Jason Dely | July 18, 2019 | Houston, TX

More than ever does the control systems security market have many available security improvement options in technologies and solutions. The threats are known and the industry understands the need to improve security. However, with limited availability of funding for security improvements, only through objective oriented security can an organization select the right solution to meet all their needs. How will organizations establish these objectives? What is needed to meet these objectives?

The [Oil & Gas Briefing](#) will explore these questions through invited speakers while showcasing current capabilities available today. Vendor presentations will focus on case-studies.
