

A SANS 2020 Survey | Automation & Integration Survey

Author: [Don Murdoch](#) | Advisor: [Barbara Filkins](#) | Date: May 2020

The 2019 Automation and Integration Survey provided an overview of where organizations are in their automation/integration journey. This extension of that survey looks at what automation activities have been successful—and why—and how organizations set up their automation activities to achieve meaningful results. Respondents will be asked to quantify their successes more concretely with the goal of understanding how organizations are able to maximize their security investment through automation efforts to improve operations.

The survey will ask key questions such as:

- What is the current level of security automation across key areas within an organization, such as the SOC, incident response and others?
- Where have respondents focused their automation efforts?
- How are organizations measuring the value of automation and integration?
- What critical automation requirements are needed to improve security posture? And what are the barriers to their implementation or realization?

Sponsor this survey and help SANS uncover how organizations set up their automation and integration activities to achieve meaningful results, quantify their successes, and maximize their security resources.
