## VIRTUAL SOLUTIONS FORUM

# MALWARE & RANSOMWARE

Friday, July 24th, 2020 | 10:30AM ET  
Opt-in Lead Guarantee: 300+

The state of play in the malware and ransomware game continues to change at a rapid pace. Those who are still trying to defend against yesterdays threats will find themselves woefully unprepared to deal with the attacks of today. Those same slow movers are likely to be devastated by whatever comes next. Security vendors have helped defenders by innovating with new classes of solutions that didn't exist even a few short years ago.

The challenge with so much innovation and so many choices is that customers can easily be overwhelmed with the hype-filled marketplace. Which solutions actually work for realistic threat scenarios, which solve unicorn problems, and which simply fail to deliver on the promise of usable security? The [SANS Malware/Ransomware Solutions Forum](#) will focus on providing specific technical advice directly from the vendor support engineers fighting on the front lines every day.

**Chairperson**  
[Jake Williams](#)  
*SANS Senior Instructor*

## Sponsorship Opportunities
