

# VIRTUAL SOLUTIONS FORUM

# OIL & GAS

## Objective-based Security Drives Effective Solutions

Friday, July 10th, 2020 | 9:30AM ET

Opt-in Lead Guarantee: 300+

More than ever does the control systems security market have many available security improvement options in technologies and solutions. The threats are known and the industry understands the need to improve security. However, with limited availability of funding for security improvements, only through objective oriented security can an organization select the right solution to meet their needs. How will organizations establish these objectives? What is needed to meet these objectives?

The [SANS Oil & Gas Solutions Forum](#) will explore these questions through invited speakers while showcasing current capabilities available today. Sponsors will showcase their products and services to a high level of security practitioners and cybersecurity decision makers, as well as help in developing a compelling agenda for the forum.
