Cloud-based services are becoming increasingly more attractive to organizations as they offer cost savings, flexibility, and increased operational efficiency. However, protecting systems, applications, and data in the cloud presents a new set of challenges for organizations to overcome. Security teams need to adapt and learn how to utilize the tools, controls, and design models needed to properly secure the cloud

The Cloud Security Summit & Training will bring together top security practitioners from leading organizations to share key principles, lessons learned, and new tools for cloud security. As an attendee, you'll explore case studies that are based on real world experience and share ideas with fellow practitioners facing similar cloud-related security challenges.
