A SANS 2021 Survey

Cyber Threat Intelligence

Author: Robert M. Lee | Date: January 2021

The 2021 Cyber Threat Intelligence Survey seeks to understand the role of CTI in organizations’ cybersecurity practices, identify use cases across intel generation and consumption, and guide best practices for the community. A particular focus this year is the continued growth and development of CTI professionals, with an emphasis on the role that CTI played during the COVID-19 pandemic and how teams adapted to provide the intelligence that informed decision makers and security practitioners during a difficult time.
